Aura watches

An Aptech E-project...

Muzammil shaikh
Kussam Syed
Syed Asim Raza
Taimoor Akram

ACKNOWLEDGMENTS

We as a team would like to thank ALLAH for giving us this opportunity to work together and to offer us a chance at this project.

Over all our efforts in this project, it would be remiss of us not to acknowledge the kind support of the teachers and mentors in guiding us towards this end we would like to extend a warm thanks to them.

Thanks to our class teachers for showing us the way when we needed it most and to our parents and siblings for showing us, support throughout the whole project. This project would not be possible without your help.

I thank the team I worked with to be understanding and talented, showing great skills. I thank the leader of our group for providing us proper guidance and keeping us all on track with the project and the rest of the team who worked tirelessly towards the end of the project.

Project synopsis

Aura watches is a site that has been built with the subject material in mind. Watches have always been a status quo of luxury and we wanted the site to be no less with a stylish design that still retains functionality.

This is all apparent with how the theme of the site reflects the subject material, the dark grey and white design is to evoke the sense of mystery that many watch brands seem to accompany in their designs. The Neo-noir style of gray fabric and black encompass this to a tee.

The homepage, products list, products detail, store locator, technology etc. have been made with the design in mind, shown with use of parallax and sliders.

Aura watches was meant to be a site given to a client who just started his foray into online marketing, and so we wanted the website simple to use and functional too. Nothing is too far out of reach going from homepage to product list to details is straightforward.

Now for covering the sites design and analysis.

Project analysis

The project has been made using Dreamweaver mainly to accomplish all design.

The site follows **HTML**, **CSS**, **JavaScript**, and **Bootstrap** code. We also used our own custom CSS file and internal CSS for more wide changes to design.

The total pages for the site are: **166**

These pages are:

- Homepage
- Product list (16)
- Product details (144)
- Contact us
- Warranty exchange
- Store locator
- Technology
- Download

The site has been completed in the allotted time and the work had been spread evenly between the working groupies.

Muzammil (Homepage, contact us, download page etc.)

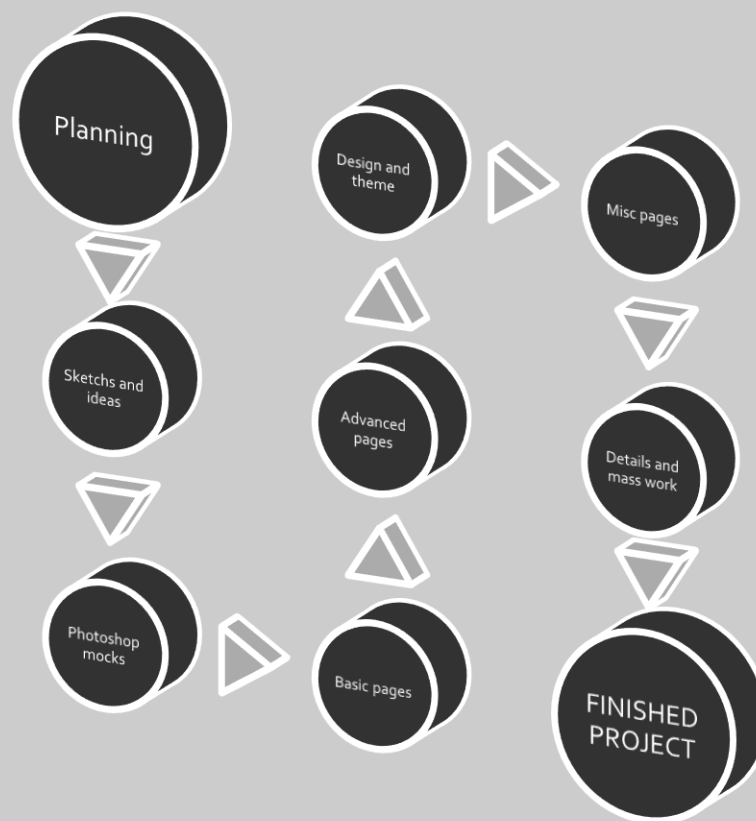

Kussam (Technology, documentation, presentation)

Asim Raza (product details (100) and procuring pictures)

Taimoor Akram (Category page, product details (44))

E-PROJECT DESIGN

The workflow

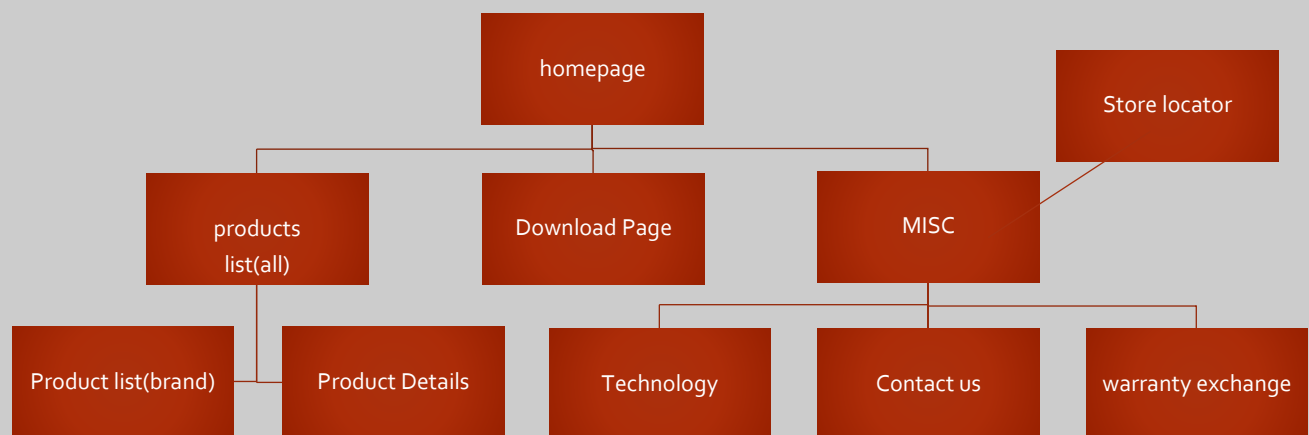

We followed a set plan from the beginning. Starting with rough notebook sketches and ideas from major brand websites before we set to work on our own site.

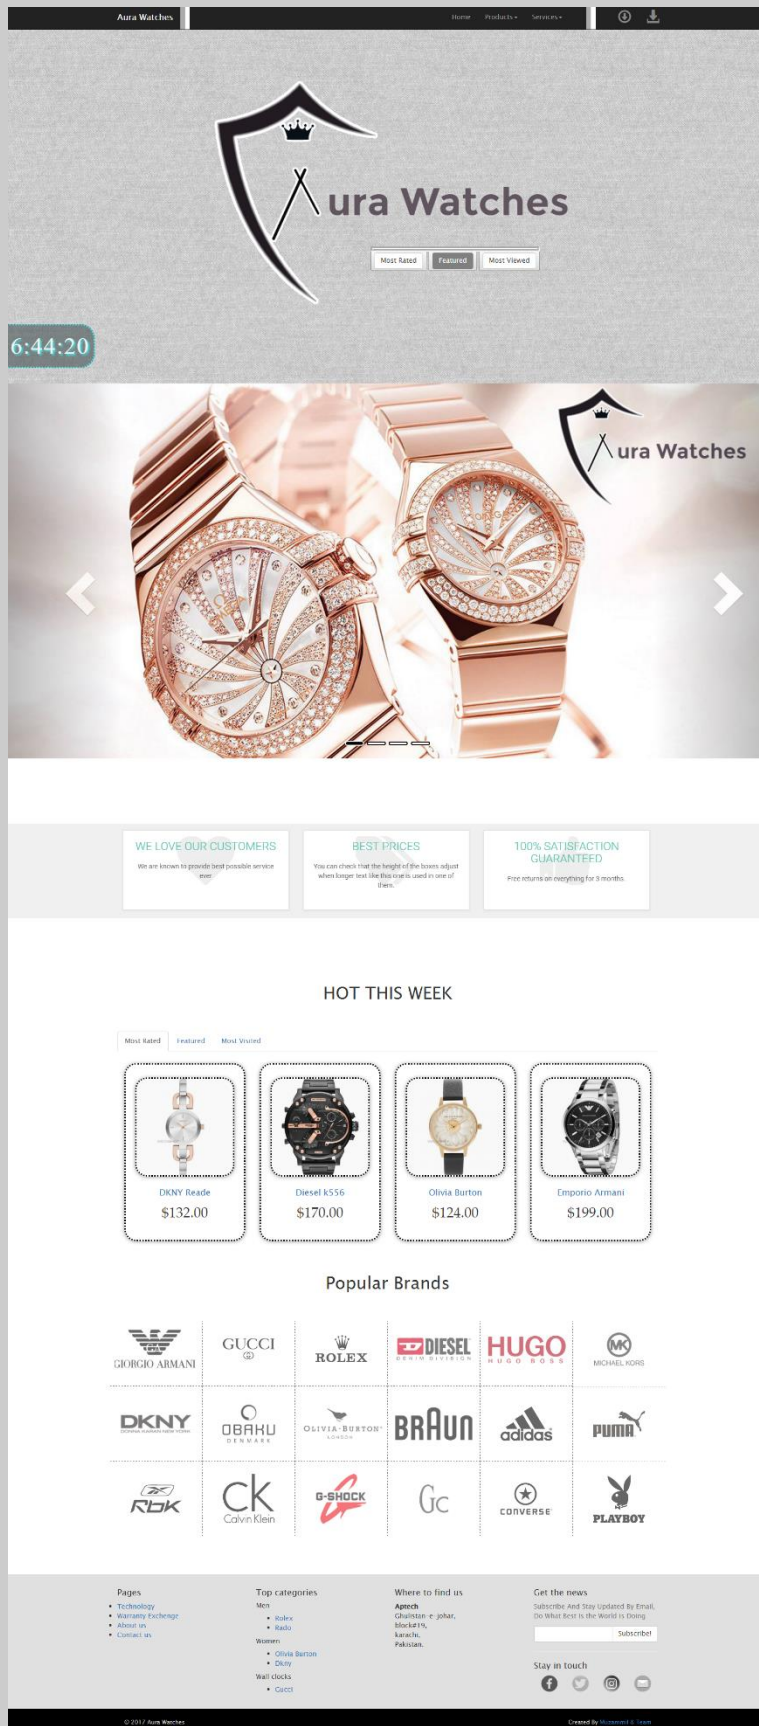

After the initial first drafts and mock pages, we began to work on basic pages which required HTML and CSS mostly (product details, products list) before moving on to advanced pages which required more CSS and JS (Homepage, Technology page, feedback) before we started

revamping the theme to settle on design suiting the site itself and then moving on to misc. pages.

Then we had mass work due to the nature of our site, which meant that we needed to put in all watches and watch brands in categories and the details for those watches

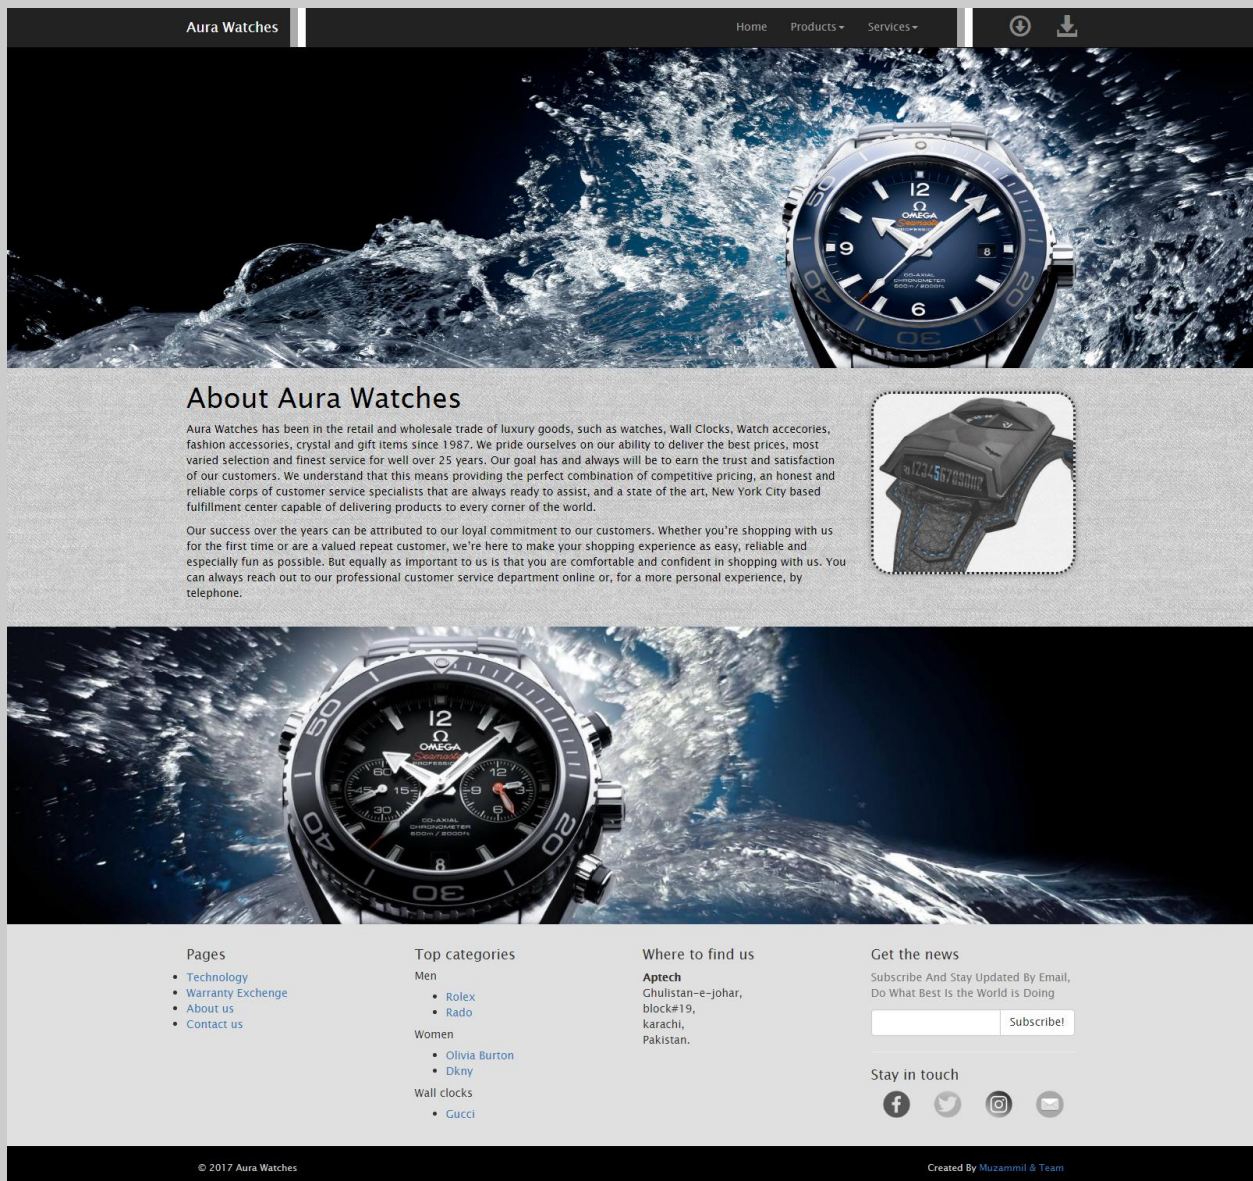

SCREENSHOTS

Homepage

The homepage contains the splash screen and logo along with a slider. Meanwhile the bottom of the page contains the featured list and the top brands of the website; the center has been given an extra touch with an aligned parallax effect to give it that one last rinse.

The featured list is clickable and shows different types of watches according to the category chosen.

About us

The about us page details whatever information is needed while still looking slick and in line with the rest of the site, using parallax to achieve a nice effect.

WARRANTY PAGE

The warranty page follows in the vein of the contact us page and features an easy to use form for sending a watch to a technician.

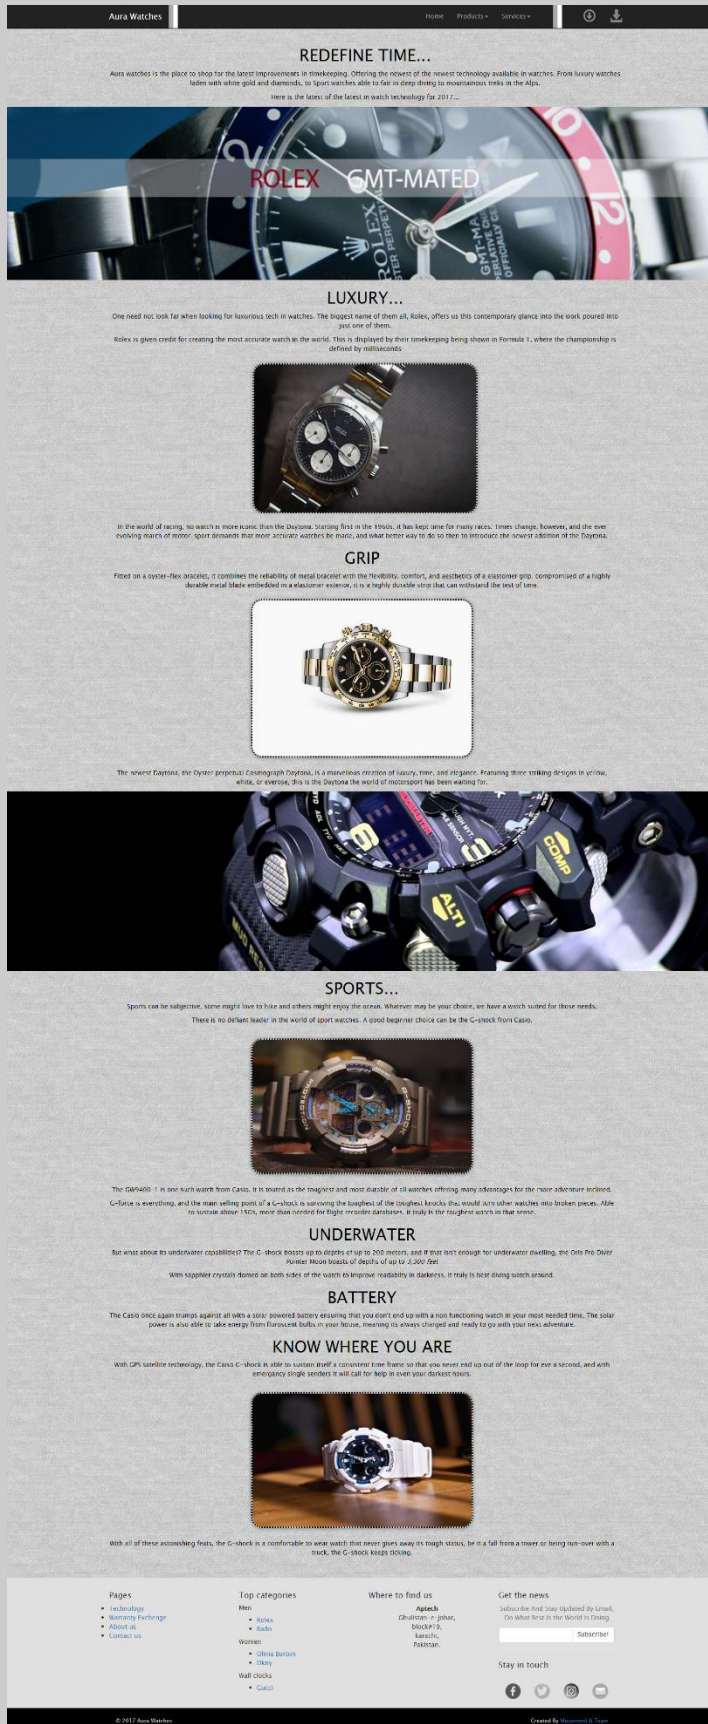

PRODUCT DETAILS

The product detail shows three pictures of the selected watch and its price in a box to the right, with its description in the bottom while the category box is shown to the left with room left to spare for an advertisement slot from google AdSense.

PRODUCT LIST

Shows a list of products, includes the sub pages of specific brands and all categories.

TECHNOLOGY PAGE

The technology page features parallax and scrolling effects to show off a stylish design, the page itself highlights the various technologies used in watches.

USER MANUAL

There is nothing too intricate about Aura Watches that might make it daunting to use, the top right menu bar handles all the links, from categories to the technology page.

The download page is easily handled by single clicks, requiring no more from you other than to click on the top right handle or in the center button on the downloads page.

Aside from those functions, the watch pages have a download button to download only those specific watches for reference.

DEVELOPER MANUAL

The watch pages are easily copy able and are easily moldable to your needs, from making new watches or revising old ones.

All it requires is that the developer simply remove the links and place their own in its place. Along with a description and price overhaul. It is a painless and quick process and is possible by even the most basic developers; all it requires is a basic knowledge of HTML and its syntax.

The code for the site, outside from minor changes to the aesthetics, has no other use than being used as a template.

Report end.
